Love

In my humble and horny opinion, audio **porn** is a deeply underrated way of consuming your smut. Don't get me wrong, I'm also a fan of watching my **porn**, but there's something uniquely satisfying about listening and tapping into your own imagination with the help of anything from narrated erotica to standalone **porn** sounds.

Luckily for me, audible **porn** (and similar sexy audio-based sex and wellness content) is on the rise. Where I used to have to dig up porny audio clips on Tumblr, I now have my pick of a wide variety of new apps and sites for anyone who wants to get in touch with their sexuality and get off using their ears. From guided masturbation tutorials to hot original stories, there's bound to be something out there that will turn you on. Check out these apps and sites to get started:

1. Dipsea

Often called the Headspace of Erotica, Dipsea has a mix of original audio stories and wellness content meant to connect you to your sexuality and desires. Their short audio stories are often character- and emotion-driven on top of being hot, so if you're someone who likes a little plot with your **porn**, Dipsea has a huge library for you. The wellness section of the app is also a treasure trove of discovery, featuring guided erotic exercises and how-tos. They cover anything from how to sext to edging during masturbation.

Try it: \$9/month for unlimited, dipseastories.com

2. Quinn

Quinn is a pretty no-frills audio **porn** site. Users can upload their own clips, including narrated scenes and stories, guided masturbation sessions, and erotic sounds of themselves masturbating or having sex with consenting partners. You can search by category, whether to narrow down by gender and sexuality, or to find specific kinks (think tags like accents, BDSM, teacher/student, and public sex).

Try it: Free, tryquinn.com

3. Tumblr

Tumblr may have cracked down on visual **porn** and explicit images in recent years, but it's still home to a ton of audio **porn**—particularly user-submitted clips, which are great for anyone who likes their **porn** to have an amateur, real vibe to it. Direct-to-listener **porn** is popular on Tumblr, meaning audio that speaks to you, whether dirty talk, instructional, or narrative. You have to search around a bit to find blogs to follow, but get started with blogs like Let Me Hear It, Sounds of Pleasure, and Audio Orgasm.

4. Audible and Scribd

Okay, so Audible and Scribd are actually two popular places to buy audiobooks in general, but still definitely helpful for our purposes. One of the best things about audiobooks is how immersive they can feel, and this is doubly so for steamy erotica. It might not be as X-rated as some of the options on this list, but well-written and well-narrated erotica can be as hot as any **porn**. Try searching "erotica" on either Audible or Scribd and sort by highly rated to see what other listeners are loving. For more information, check out SELF's guide to finding truly sexy erotica.

5. Audiodesires

Audiodesires is relatively new, so they don't have a robust library yet and are still growing with weekly releases. So far, they have stories designed for women and couples, with the couple stories leaving intermissions for you and your partner to get in on the action together. They also have a whole section dedicated to erotic ASMR—so if you want to get those sweet, sweet brain tingles as you listen to your **porn**, this is the app for you.

Try it: Free for limited access and \$4/month for premium, audiodesires.com

6. Girl on the Net

Girl on the Net is a U.K.-based sex blogger who does a lot more than just produce audible porn, but it's certainly one of the things she's known for. On her site, you can enjoy a mix of erotic fiction and real-life sex stories, and BDSM lovers in particular will have a lot to choose from. As a bonus, she also links out to other sex bloggers, some who do audio erotica too (such as On Queer Street).

Try it: Free, girlonthenet.com (but you can support her on Patreon!)

7. Literotica

This free erotic fiction site may be best known for its user-written stories, but it has a pretty solid collection of adult audio too. Depending on what you're into, there's a mix of narrative-driven smut (such as an erotic murder mystery series, seriously) and pretty straightforward stories that lean hard on common fantasies (like boss/employee, BDSM, and infidelity).

Try it: Free, literotica.com

8. Vibease Chat

So technically, Vibease Chat is an app companion to the Vibease vibrator (\$95, vibease.com). On top of being a remote control vibrator good for long-distance play with a partner, the Vibease vibrator can also sync with erotica from its app. Meaning, yep, it vibrates in time with the narration. That said, you don't actually need to use the vibrator to enjoy the app. The library has a mix of free and for-purchase stories that you can listen to without the vibe.

Try it: Free with per-story pricing, vibease.com

9. Hedit

Much like Tumblr, Reddit has some steamy audible **porn** if you know where to look, such as r/gonewildaudio. You might have to wade through the many posts to find stuff that you like, but some subreddits have filters to help you avoid content and kinks you really don't want to see. If you're looking for something more vanilla but still potentially erotic, check out r/pillowtalkaudio. Bonus: Both subreddits allow you to post requests that other users can fill.

10. Enjoy

This intimate self-care app leans a bit more toward wellness than **porn**, with guided audio practices and pleasurable meditations, but it has erotic stories as well. If you're looking for a more holistic app that will help you get in touch with your desires and sexual well-being, Enjoy is an excellent place to start. It's kind of like taking a class about your own body and sexuality--and the homework includes listening to erotica.

Try it: Free for limited access and \$30/year for premium, letsemjoy.com
